The Organizing Committee reserves the right to reject papers that do not comply with this or include representative titles and technical merit (See on the website). Session moderators will review all papers and presentations for compliance.
- Ensure to uphold the PPCA Principle of Comparison, see page 2 of this document.

**Plastic Pipes Conference Association – guidance on material comparisons.
This applies to abstracts, papers and presentations.**

- o PPCA would like to remind all of the guidance regarding the issue of comparisons.
The PPCA BOD confirms that direct comparisons being made between the performance of different primary plastic materials used for the same product application is not allowed. The fundamental principle has always been to promote all plastic pipe materials during the Plastic Pipes Conference. However, this does not apply to comparisons between different variants of the same material (e.g., PVC and PVC-O or PP and PP-MD) or of course comparisons with other “non-plastic” alternative materials.
- Papers must be in the format of a PDF file or a Word document. Papers should be saved both on a USB (as backup and to bring with you) and also emailed to peter@evacon.hu.
